

Stonington Commons Stonington, CT

This award-winning re-development of a historic mill complex into a luxury condominium development incorporated Hambro MD2000 floors to ease the installation and erection process and to increase its cost-effectiveness.

"If I had my choice I would definitely choose Hambro because of how well the team worked with us. With MD2000 we were able to put three or four pieces together, weld the deck into place, fly it up as an assembly and put the infill on the sides, and it was easy."

**- Blake Hodess, President
Hodess Construction Co.**
